FIRST-CLASS FURNISHED ROOMS TO RENT.

L. M. LARSON, Proprietor.

Hello, Everybody! A Happy New Year!

W. E. HAYES, Phm.B.,
DISPENSING CHEMIST,

Has opened a Drug Store in Stony Plain. He hopes to give Courteous Treatment and Prompt Service at all times.

He solicits your patronage for the following reasons:

Thirty years' experience in the Drug Trade. Highest quality that can be procured in all lines. Satisfaction Guaranteed.

The purest drugs obtainable are guaranteed in all prescriptions, and all prescriptions will be filled exactly as ordered by your physician.

He will specialize in Stationery and School Supplies, Patent Medicines, Toilet Articles, Drugs and Drug Sundries, and Prescriptions—Medical, Dental or Veterinary.

SEE HIS PRICES FIRST!

W. E. Hayes, located at the Kelly Bldg.

FARMERS' MEAT MARKET.

FRESH MEATS OF ALL KINDS.

Agents for BRITISH AMERICA OIL CO. and all their

Products: Hard Oils, Greases, Trehether's Oils,

Belt Dressing, etc., etc.

SERVICE GARAGE, Stony Plain.

A. RONENTHAL FARMER
HEADING FOR THOSE
BALMY B. C. BREEZES

The lure of a temperate climate, pleasant surroundings, and easy work—merely watch the fruits grow—is having its effect on members of our farming community; so much so that some have already succumbed, and others are about to. Among the latter are Edwin Hoffmire, who, last summer made a motor trip thru farming districts of the province to the west, and succeeded in acquiring a 10-acre plot in the Chilliwack district. This westward size farm has buildings, and some dairy cattle, etc., all ready to move on to, which Mr. Hoffmire intends to do, with his family, in the course of a few months. As the farm equipment he already has, on his farm in Rosenthal district will not be suitable for working his B. C. layout, Mr. Hoffmire intends holding a clearance sale of his entire stock of machinery and stock.

Moved to Stony Plain.

Mr. and Mrs. W. E. Hayes have taken up their residence on First avenue east. They are accompanied by their two daughters, Miss Muriel and Miss Dorothy.

Mr. Hayes is Stony's new druggist, located at the Kelly Building.

In the Event—

If a motion to be presented at the coming UFA Convocation by Westaskiwin Local meets with the approval of the delegates, Labor and UFA forces will co-operate in the forthcoming election. The motion suggests "the next provincial election shall be co-operative in character and that Labor and the UFA shall have representatives in the Cabinet in the event of hopes being realized" of the 2 groups obtaining a majority in the Legislature.

The UFA Convention.

On Tuesday, Jan. 15, the annual convention of the UFA will open in Calgary, a week earlier than was first decided. The change was made in order to make it possible for Federal UFA members to attend the convention before leaving for Ottawa to attend the opening session of the House of Commons.

G. G. Coote, M. P. for Macleod, is to be a special speaker at the convention, taking as his subject "Finance." He is regarded as a leading western exponent of monetary reform.

Resolutions ranging from social credit and monetary reform to the manufacture of salt and the price of hogs will be discussed.

Other resolutions to be presented urge co-operation between the United Farmers and Social Credit groups; that married women be not employed as teachers; that the Provincial Govt. take over distribution and control of fuel oils and others.

The proposed new UFA plot form also will be discussed.

HARDWICK'S THE HOUSE OF QUALITY.

Non-run Rayon Si'k Bloomers.

Firsts. Peach, Old Rose, Nile. Small, medium and large. Per pair 35c., 3 pairs \$1.

Plain Broadcloth, Famous Wabasso.

Heavy quality; high lustre finish; fine quality; permanent finish; 36 inches wide. 3 yards for 50 cents.

"Patsy" Prints.

The Nation's favorite Cotton "Patsy"; strong and long wearing; full 30 inches; never prettier prints. 2 yards for 25c.

Bed Sheets, bleached and hemmed.

8-4 Bed Sheets; good quality cotton that will wear and wear. Each \$1.10.

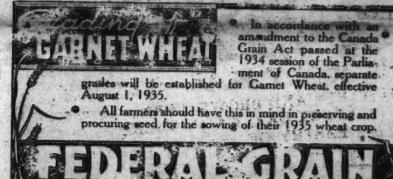

9-4 size; same quality as the smaller size! Each \$1.25.

Sub-Standard Towels.

Clearing these at a Bargain Price; imperfections are hardly noticeable; the size is 17x34. Per pair 29c.

Population Of Canada Is Year By Year Becoming More Of Canadian Born Composition

Remarkable changes are taking place in the population of Canada. As it increases year by year it is becoming more and more a Canadian-born population. This is one of the direct results of the years of depression.

As 1935 begins it finds Canada with a population of some 10,835,000 according to the Dominion Bureau of Statistics, just 155,000 more than a year ago. This is no despite the barriers which have been steadily maintained against immigration during the last four years.

Further the increase from 1933 to 1934 of 155,000 is the largest in a single year since 1928.

Prior to 1930 when Canada's doors were open to immigrants from overseas the doors of the United States were open to Canadians. As immigrants moved in Canadians moved out. Now immigrants stay out and Canadians stay in. The natural increase in population balances the gains formerly made by the excess of immigrants over the number of Canadians leaving Canada.

In the 19 years from 1911 to 1930 the number of people in Canada rose from 7,207,000 to 10,205,000, an average yearly increase of 157,000. In the four years from 1930 to the present when the immigration bars were set up the population has increased from 10,205,000 to 10,835,000, an average annual increase of 157,200, approximately the same.

Heavy Water Compound

Toronto Man Not Afraid To Sample New Chemical Composition

G. H. Carter, 48, government employee, of Toronto, has \$50 or any part of it to bet he will drink a thimbleful or even a glass of "heavy water", a compound of recent discovery and valued at \$10,000 a quart—and suffer no temporary or permanent ill effects.

The heavy water compound, discovered a year ago by Dr. Harold G. Urey, has been mentioned as one of the possible causes of symptoms of old age and cancer. He has been awarded the Nobel prize in chemistry.

Heavy water is composed of two atoms of double-weight hydrogen (deuterium) and one of oxygen. Of every 5,000 drops of water, one is "heavy." It is far more weighty than river water and believed to have therapeutic uses as yet undiscovered. It is being used now almost entirely by research chemists.

The British Isles

Most Numerous Are Hebrides, But Majority Not Inhabited

It is scarcely possible to calculate how many islands comprise the British Isles if we include every little rocky projection, but more than 5,000 have been charted. Most of them are to be found off the western shores of Scotland and Ireland, where the coast has been broken up by the full fury of the Atlantic.

Most numerous are the Hebrides, which comprise about 500, although the majority of them are uninhabited. There are more than 50 inhabited islands in the Shetlands and Orkneys, and there are about 150 others on which no one lives.

Studying Cereal Diseases

Dr. Greaney Of Winnipeg To Spend Year In England

Dr. Frank Greaney of the Rust Research Laboratory, Winnipeg, has gone to England to spend a year at the Rothamsted Experiment Station. Dr. Greaney has been working on the control of root rot diseases of cereals and for the past few years has devoted considerable time to a study of the effect of fertilizers in connection with the diseases of cereal crops. At Rothamsted are the most famous and outstanding fertilizing experiments in the world and their work on soils is known all over the world.

People of Romania are again adding to their bank savings accounts.

Think Drought Punishment

Queen Commemorates India To Bring Rain

So acute has the drought become in several districts of the Madras Presidency that religious ceremonies are being held in a number of towns to appease the wrath of God, who the inhabitants believe, has sent the drought to punish sinners. Edigies of "Kondampudi" (The Great Sinner on Earth) are dragged through the streets, with "mourners" accompanying them, beating their breasts. This ceremony represents the death of great sinners, and the world being rid of them, it is believed that rain will be sent.

In Dharapuram, where acute distress prevails because of the lack of even drinking water, a crowd of half-naked, bare-footed and bare-headed in the traditional style, went to a neighboring village, where prayers for rain were offered up. That night, for the first time in eight months, rain fell in Dharapuram.

Source Of Instinct

Interesting Experiment Conducted By American Scientists

A hypodermic of "hen instinct" extracted from a hen's head, sets roosters to clucking.

This is tried in the amazing story of an announcement at the American Association for the Advancement of Science of the first discovery ever made of the real nature and source of an instinct.

This particular instinct, "broodiness" or the wish to cluck and sit on eggs, turns out to be a very powerful chemical called prolectin. It appears to open a new explanation of the things called behavior and beyond that of understanding the sources of consciousness.

The experiments were reported by Dr. Oscar Riddle, Dr. Robert W. Bates and Mr. Ernest L. Lahr, of the Carnegie Institution of Washington station for experimental evolution at Cold Spring Harbor, N.Y.

Football Fatalities

Challenge To United States Schools To Reduce Death Toll

A sharp challenge to United States high and preparatory schools to reduce their football death toll was issued by Prof. Floyd H. Eastwood of New York University in reporting the results of a four-year survey of football fatalities.

Fatal injuries in college, athletic club and sandlot games are decreasing, Eastwood told the American Football Coaches Association. In contrast, the undiminished number of high and preparatory school fatalities form an increasing percentage of the year against 26.3 in 1931.

Return To Native Land

One Hundred And Fifty Destitute Chinese Sell Frost B.C.

One hundred and fifty Chinese, destitute and unable to find employment, have started the journey back to China at the expense of the British Columbia government, Hon. G. S. Pearson, minister of labor, announced.

Mr. Pearson said the Chinese went voluntarily because they felt they would be better off in their native land, where they can join relatives and friends. The government will also gain through the arrangement by eliminating future costs for their support.

All the Orientals were from British Columbia and there is no bar against their returning when they are financially able to do so.

Edmonton, N.W. Foothills

Showing a profit on the 1934 operation of \$15,000, the Edmonton Exhibition Association's new venture is more successful than any other class "A" fair on the North American continent. Manager Ferenc W. Abbott, K.C., told the annual meeting of the exhibition shareholders.

Success Seems Assured

Medical Authorities Believe Anti-Paralytic Vaccine Is Ready

Five years ago, in a Montreal laboratory, Dr. Maurice Brody set himself on the trail of the germ responsible for afflicting untold millions with infantile paralysis.

Some medical authorities accept his anti-paralysis vaccine as a new proven guardian against the disease which destroys the spinal motor cord and seizes millions, thus causing lameness and withering of limbs.

"Genuine proof," says the young scientist, "will be in studies in epidemic areas."

Only then can it be determined if the immunity gained in vaccinated persons is adequate.

The young Canadian bacteriologist reported before the Pittsburgh convention of the American Association for the advancement of science on his long labor and the vaccine they have produced to bring high hopes that the frightful disease is to be cured.

The modest, 31-year-old Ottawa scientist left untold, however, the fact that his experiments appear to be also pointing a way to ridding the world of sleeping sickness.

His laboratory search for a preventive vaccine for this mysterious malady is advanced to the point where vaccinated white rats are able to withstand intracerebral injections of the virus itself.

Senseless War Talk

General Smuts Says Pacifists Are Mostly Responsible For It

The condemnation by General Smuts of what he rightly described as senseless war talk is very timely. The curious thing about it, he said, is that the pacifists are mostly responsible for the scaremongering.

It is perfectly true. There is an old saying that if a thing is repeated sufficiently often people will come to believe it. The pacifists never weary of proclaiming that we are on the brink of another war.—Belfast Telegraph.

Monkeys and apes are afflicted by tooth trouble in the same manner as human beings.

One-fifth of all homes in the United States are without kitchen sinks.

Turkey Finishes Payment To Britain Of Loan Made 60 Years Ago

Turkey recently finished paying off its debt to Great Britain which dated back to 1878 and the Balkan Wars of that period. She paid the last of a sum of \$5,000,000 (\$500,000) in installments on June 60 years ago. British authorities expressed satisfaction with the promptitude and regularity of the Turkish payments.

These figures seem to indicate the war and cold years come in cycles with the cold years around 1878 to 1890 and the warm years between 1926 and 1931.

Two important questions to be answered in the future will be, what is causing this peculiar change in our climate and how long will it continue? Mr. Denison can answer the first question as far as British Columbia is concerned.

"It is evident that in recent years the North Pacific ocean storms have been more severe and widespread, and have caused unusual ocean currents from the warmer southern latitudes and these in conjunction with mild weather prevailing in these vast ocean storms have caused milder weather on this coast," he said.

Although the Pacific coast is experiencing some of the coldest weather it has had for some time, Mr. Napier Denison, director of the Dominion meteorological observatory at Victoria, said recently that the climate of British Columbia and of the whole Dominion has been gradually turning milder for the past fifty years or more.

Winnipeg can boast of the greatest change in average temperature, said Mr. Denison, with an improvement of six degrees, 1885 being the coldest year on record during the last 53 years and 1931 the warmest.

Records for Toronto and Montreal show these cities have experienced a gradual rise of about four degrees. Montreal's record cold year was 1875 and 1931 was the warmest.

Alberta and the Maritime provinces are tied in third place, both being about three degrees warmer. Records at Calgary show the lowest temperatures to be 1887 and the highest in 1931, while 1878 was the coldest year recorded at Charlottetown, P.E.I., and 1931 the mildest with 1890 and 1931 coming next.

The Pacific coast shows the smallest change of all, about one and one-half degrees. Records show 1886 and 1884 were the coldest years with 1932 and 1915 coming near the low mark, and 1926 being the warmest. Port St. James, in the northern interior, shows a change of about three degrees in the past 40 years.

These figures seem to indicate the warm and cold years come in cycles with the cold years around 1878 to 1890 and the warm years between 1926 and 1931.

Two important questions to be answered in the future will be, what is causing this peculiar change in our climate and how long will it continue? Mr. Denison can answer the first question as far as British Columbia is concerned.

"It is evident that in recent years the North Pacific ocean storms have been more severe and widespread, and have caused unusual ocean currents from the warmer southern latitudes and these in conjunction with mild weather prevailing in these vast ocean storms have caused milder weather on this coast," he said.

Taken Out Of Circulation

Sixty Million In Paper Currency Destroyed Every Year

Sixty million dollars in Canadian money goes down the sewer annually into the Ottawa river. From the east block of the Parliament building it is poured into the sewage system with all kinds of refuse periodically. It is beyond retrieval even in times of depression.

The sum total represents Canada's bill of all denominations, taken out of circulation. Because of wear and tear, their life averages from nine to 12 months. In one and two-dollar bills alone, \$40,000,000 are destroyed each year.

Time-worn paper currency is treated now by the department of finance in paper-mill fashion. Oiled beyond recognition with the aid of chemicals to obliterate the print and coloring, the bills are put through a steam pressure and beater and then shoved into the sewer pipe.

Indians Blame White Man

Say They Have Caused Disappearance Of Caribou Herds

From Fort Chipewyan, in Alberta's northland, thousands of caribou which a short time ago roamed the bush country, closest to that point in many years, have vanished, according to a wireless despatch received by the Edmonton Journal.

Indians blame the white man for the disappearance of this natural meat supply. They base the claim on an old superstition that wild animals must be speared or shot to death and not skinned. The story is that a white hunter recently wounded a caribou and then kicked the animal down with the butt of a gun.

A bachelor's life, after all, is just one undivided thing after another.

Records Show Climate Of Dominion Gradually Turning Milder During Past Fifty Years

Minerals For Young Chicks

Feeding Too Little Is As Bad As Too Much

There is such a thing as overfeeding young chicks on minerals, and that is just as bad as underfeeding. The rather strange thing, however, is that an excessive supply of minerals manifests itself in much the same manner as when too little mineral matter is supplied. A chick containing the usual percentage of meat scrapes or meat and bone meal and dry skim-milk, according to tests at the Ohio experiment station, carries until they are ten weeks old.

These tests are in accord with results obtained at other stations, and may therefore be considered as quite reliable. Meat scrapes, of course, are very rich in calcium, carrying from 20 to 25 per cent of that element, which normally makes up three-quarters of the minerals in the meat of chickens. Dry skim-milk carries about 10 per cent of phosphorus and calcium.

With one substitution of pure vegetable protein for meat scrapes in the diet, it is highly desirable to feed additional minerals as the vegetable protein does not contain as much mineral matter as the animal protein.

Pay Old Debt

Turkey Finishes Payment To Britain Of Loan Made 60 Years Ago

Turkey recently finished paying off its debt to Great Britain which dated back to 1878 and the Balkan Wars of that period. She paid the last of a sum of \$5,000,000 (\$500,000) in installments on June 60 years ago. British authorities expressed satisfaction with the promptitude and regularity of the Turkish payments.

The SNAPSHOT GUILD HOW ABOUT MOVIES?

May as well be frank about it. Until a few months ago I had the notion, shared by a good many other folks, that home movies were (1) expensive, (2) difficult, and (3) not very good.

Then Bill, a friend of mine, got a movie outfit. Neither he nor his family can be classed as wealthy, or anything like it, but there was a great deal of enthusiasm in his camera. Naturally, I was curious.

The camera itself was about the size of a small pocket. Still from a top to bottom without any fun at all. It was not the picture pin sharp and about as simple. Bill showed me how to run it. You merely held it up, aimed it at you would a gun, pressed a button and you are making a movie.

Of course, it takes a spring to wind and a lens aperture to set, but it was any amount simpler than my favorite snapshot camera.

That particular camera is a real example, though. For a few cents you can get a good movie outfit.

I and there are two standard sizes for amateur movie film—8 mm. and 16 mm. (minimum size).

Usually, costs are less in the 8 mm.

class than in the 16, but even the 16 mm. outfit are surprisingly reasonable.

Of course, you can spend a great deal of money on special equipment, but it's not at all necessary.

By the way, with certain 16 mm.

cameras you can get second pictures in full color. That's something snapshotters can't quite do, to date.

JOHN VAN GUILDER.

DON'T RISK BAKING FAILURES

Notable Progress Made by Royal Bank of Canada

Deposits Increase \$50,000,000—Liquid Assets \$382,172,287
—Profits Down Slightly After Heavier Taxes

The financial statement of The Royal Bank of Canada for the year ended November 30, 1934, reflects a period of improved business conditions. Figures of total assets, deposits, cash and investments, commercial loan and note circulation all show an increase during the year.

Total assets are \$758,423,004 of which \$382,172,287 are liquid, being 66.16% of total liabilities to the public, compared with 55.76% a year ago. Cash, cheques and bank balances aggregated \$165,883,031 or 24.8% of total assets.

Government and municipal securities have increased during the period from \$113,782,602 to \$133,220,489.

Big Gain in Deposits

The outstanding feature of the statement is the increase of \$50,545,510 in public deposits. Of this increase it is understood that \$41,347,334 is in Canada, the balance abroad. Canadian savings deposits rose by \$11,236,336.

After a steady decline in commercial loans of banks in Canada over the period of the past few years, there was a note of hope in further evidence of business revival, that the Royal Bank's figures under this heading show an increase of \$10,624,494, the total standing at \$213,782,602.

Profits for the year were \$4,386,217 but are not properly comparable with published profits for the previous year, because heretofore they were reported after deducting Provincial taxes but before Federal

taxes. For the sake of uniformity, and the fuller information of shareholders, both classes of taxes are now disclosed in the published report.

During the year under review Dominion and Provincial taxes aggregated \$1,075,016. Making allowance for the increase under this heading, profits are lower by \$265,000. Net profits after taxes and federal dividend requirements of \$2,800,000, annual contribution of \$200,000 to Officers' Pension Fund, the usual appropriation to the Royal Bank Foundation, and left a surplus of \$123,200 to be added to Profit and Loss Account, increasing that account to \$1,506,804 to be carried forward to the next fiscal year.

The showing, while gratifying to the shareholders, will this year be of special interest to the public, as it affords a clear measure of confidence yet given of the extent of the improvement in trade throughout Canada.

The Annual General Meeting of shareholders will be held at the Head Office of the bank in Montreal on Thursday, January 10th.

The principal accounts with comparative figures for the year, are as follows:

	1934	1933
Total Assets.....	\$758,423,004	\$729,260,478
Dep. and Prov. Gov. & Mun.	382,172,287	362,711,645
curr. Loans in Can.	133,220,489	113,782,602
curr. Deposits in Can.	226,942,028	214,849,534
Int.	485,126,483	442,846,084
Free Deposits	124,452,970	119,778,860

Lest We Forget

War Film Designed To Bring Canadians The Lesson Of The Futility Of War

While the government cannot be said to have "gone Hollywood," it is nevertheless true that cabinet ministers now appreciate the problems attendant upon evolving a title for a moving picture.

A recent meeting of the privy council beheld the unusual spectacle of the nation's administrators seriously worried and sucking their pencils as they tried out various titles for the film shortly to be produced under government sanction. Finally an inspiration struck the cabinet, and "Lest We Forget" was born and approved.

And so, "Lest We Forget" it is—the name of the picture compiled from many thousands of feet of film taken overseas during the war, and, trimmed into a connected and coherent story of Canada's war effort, is designed to bring home to the Canadian public the stupidity and fruitlessness of war. The picture is being presented and will have its premiere early in the new year under the auspices of the Canadian Legion.

The production is of feature length, dividing the war into three definite periods.

In all sequences the cost of war is vividly illustrated.

The temperature seven miles above the earth is nearly constant, according to scientific belief.

WORLD HAPPENINGS BRIEFLY TOLD

The Sheffield, England, city council, for the fifth time in a few years, has voted against allowing Sunday golf on the municipal golf courses.

Slot machines will not be allowed to operate in Yorkton any longer it was decided by the Yorkton council at its final meeting of last year.

An 11 per cent. increase in wheat production and a six per cent. growth in wheat acreage in England and Wales this year was announced by the ministry of agriculture.

The first fatal atmospheric bank robbery in the memory of Budapest's 1,000,000 inhabitants cost the lives of a cashier and one of three bandits.

Sir Flinders Petrie, 81-year-old archaeologist, has left London with his wife for northern Syria to search for remains of a civilization of 5,000 years ago.

Ernesto Chacon, Ecuadorian charge d'affaires to Germany, was found dead in the vestibule of a building at New York under circumstances regarded by police as mysterious.

M. H. Gandhi, Indian agitator, has been warned by the British government of India that any attempt to revive the civil disobedience campaign will not be tolerated.

"Generally speaking, the entire west is in better shape this year than last year," Hon. John J. Maclellan, minister of public works in the Alberta government, said at Sydney, N.S.

FASHION FANCIES

SOPHISTICATION COUNTS WITH SCHOOL GIRL OF 8 TO 14-SHELL FAIRLY WANT TO LIVE IN THIS TWO-PIECE DRESS

By Ellen Worth

Again smart woolen—and gay—for the dancing, this two-piece dress this figure is wear.

Note how prettily the skirt flares and smartly it buttons down the center-front. The shirtwaist blouse is prettily gathered to a slender waistline and it is in a hip belt, so modish.

The cunning scarf with hand rolled hem for preference—slips so jauntily 'neath the tab closing.

The pattern is particularly attractive as the origin is bright red and navy checked woolen blouse, plain, bright red woolen skirt with navy crepe tie.

All in one fabric with navy blue wool crepe bottom in hem and waistline and valances. It's very lovely, too.

Style No. 834 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/4 yards of 35-inch material and 1 1/2 yards of 35-inch blouse; 7 1/2 yards of 35-inch contrasting for blouse; 7 1/2 yards of 6-inch ribbon for bow.

Patterns 20c each. Address mail order to: Pattern Department, Winnipeg, New Union, 175 McDermot Ave. E. Winnipeg.

Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine.

Pattern and magazines are \$1.00 each.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

An Extraordinary Figure

Lloyd George Is Man World Cannot Ignore

It was a summer afternoon in 1890

when Mr. Gladstone, in frockcoat and tea-rose, complimented Mr. Lloyd George, fresh from a by-election in Carnarvon. In the long years since then two reigning British sovereigns have died, the British Empire has fought two wars, dynasties and nations have disappeared, the map of the world has been changed. Yet now we read that this same Lloyd George, whose voice has sounded through all this din of four decades of world upheaval and revolution, is to lead a new political movement.

In his 71st year, veteran of a thousand and nights, he is "buckling on his armor."

No need to ask of the movement which Lloyd George is to lead. The arresting thing here is not the movement, but the man; this beginning of a new chapter in the story of a leader whose career defies fiction. Men may admire Lloyd George passionately, or hate him violently; it is impossible to ignore him. Whatever history's final verdict upon him, whatever it may decide about his policies and his motives, it will have to write of him as one of the most extraordinary figures of his time—Ottawa Journal.

SUNDAY SCHOOL LESSON

JANUARY 13

PETER'S GREAT AFFIRMATION

Golden text: "And Simon Peter answered and said, Thou art the Christ, the Son of the living God." Matthew 16:16.

Lesson: Matthew 16:13-28; Luke 16:18-36; I Peter 2:5, 6.

Devotional reading: Psalm 31:8.

Explanations and Comments

Peter's Great Affirmation of Faith, Luke 9:18-20. Now it happened that while Jesus was praying by himself, his disciples were sleeping. (Matthew 14:25, translation.) Suddenly he turned to them and asked, "Who do the multitudes say that I am?" Very readily they answered, "John the Baptist; others, Elijah; and yet others, one of the prophets." Recall that in Matthew 16:14 adds "Jeremiah." Recall how Herod had called Jesus John the Baptist, Mt. 14:2.

"But who is man that living with whom he could be compared? When we want to stir men's hearts, we appeal to the dead; when we search for the great, we descend into the grave; when we search for the wise, we turn to the dead; when we search for the good, we turn to the angels. Who do the multitudes say that I am?"

Very readily they answered, "John the Baptist; others, Elijah; and yet others, one of the prophets." Recall that in Matthew 16:14 adds "Jeremiah." Recall how Herod had called Jesus John the Baptist, Mt. 14:2.

"But who say ye that I am?" continued Jesus. The young ones said: "But ye who do you say that I am?" And Peter, an spokesman for the group, answered with conviction, "The Christ, the Son of the living God." Is Matthew 16:17 the high, lowly origin of the Carpenter, the familiarity of daily intercourse, the shocks of disapproval, the delay of hope, making the heart sick, the high, lowly origin of the highly authorized teachers of Israel, the ebbing tide of his popularity in Galilee, might have almost justified a fisherman's inability to decide this question? The origin of all doubts and dreadful uncertainties there was that in Simon's soul which leapt up in answer to the Master's words—wholeheartedness and a desire to serve the great. The desire in reality in Jesus—inspired by this desire, he tramped down all doubts, and burst out in enthusiastic confession of faith and loyalty.

"But who say ye that I am?" continued Jesus. The young ones said: "But ye who do you say that I am?" And Peter, an spokesman for the group, answered with conviction, "The Christ, the Son of the living God." Is Matthew 16:17 the high, lowly origin of the Carpenter, the familiarity of daily intercourse, the shocks of disapproval, the delay of hope, making the heart sick, the high, lowly origin of the highly authorized teachers of Israel, the ebbing tide of his popularity in Galilee, might have almost justified a fisherman's inability to decide this question? The origin of all doubts and dreadful uncertainties there was that in Simon's soul which leapt up in answer to the Master's words—wholeheartedness and a desire to serve the great.

Jesus was an undesirable substance and fuel, because it injures bones and muscles.

Sulphur is found in vast quantities, both in the earth's crust and in sea-water. Gaseous sulphur or hydrogen sulphide is one of the most important of the sulphates. Millions of tons of gypsum are mined every year, and it is used in agriculture and in the manufacture of plaster-of-paris.

Sulphur is also found in the vegetable and animal kingdoms. Sulphur is thus an essential part of most forms of life. Sulphur compounds are found in garlic, onions, horseradish, turnips, and other plant and animal substances. Sulphur is also found in petroleum and in coal. It is an undesirable substance and fuel, because it injures bones and muscles.

Sulphur has many important commercial uses. Its chief use is to produce sulphur dioxide gas, which is used in making sulphuric acid. Sulphur is also used for bleaching and disinfecting. Large quantities of sulphur are used in the manufacture of gunpowder, vulcanized rubber and matches. It is also used extensively in the manufacture of insecticides for use in orchards and vineyards. The chief sulphur insecticide is known as lime-sulphur spray, which is made by boiling sulphur with slaked lime, by which process a deep-red liquid is obtained.

This liquid is an excellent insecticide, especially for scale, and it can also be used as a fungicide.

MONTREAL WOMAN SWEARS TO TRUTH

In poor health since twelve years old, Mrs. Florence Williamson of 7420 Bloor Street, Ave., Montreal, tells in a sworn statement that she is a native of Canada and at last became completely free from constipation. To convince everyone of the absolute truth of her statement she has consented to tell of her experience under oath before a notary. She declares, "Since I was twelve years old, I was ill with constipation, never stopped until I started taking Fruit-a-tives and now I can truly say that they gave me wonderful relief. I enjoy life once more through the use of Fruit-a-tives, while the same trouble had tormented me before I had Fruit-a-tives."

Copy of Mrs. Williamson's sworn statement will be sent on request. Write Fruitatives, 1000 Bloor Street, Montreal.

FRUIT-A-TIVES—25c and 50c EVERYWHERE

Little Journeys In Science

SULPHUR

(By Gordon H. Guest, M.A.)

Sulphur is an element which occurs naturally and is widely distributed in nature. It is a solid, yellowish-white, uncombined with other elements, it is found in volcanic districts of Italy, Sicily, Iceland, Mexico and other countries. Native sulphur is abundant in Sicily and is found in the United States.

Sulphur in the combined state, that is joined with other elements, is more common and widespread. It is found chiefly as sulphides and sulphates. Sulphides are chemical compounds containing sulphur and one other element, usually a metal. Many sulphides are toxic to man, due to man, such as iron pyrite, copper pyrite, zinc sulphide or blende, lead sulphide or galena, and mercuric sulphide or cinnabar. Iron pyrite looks very much like gold and hence is called "fool's gold."

Sulphates are found in vast quantities, both in the earth's crust and in sea-water. Gaseous sulphur or hydrogen sulphide is one of the most important of the sulphates. Millions of tons of gypsum are mined every year, and it is used in agriculture and in the manufacture of plaster-of-paris.

Sulphur is also found in the vegetable and animal kingdoms. Sulphur is thus an essential part of most forms of life. Sulphur compounds are found in garlic, onions, horseradish, turnips, and other plant and animal substances. Sulphur is also found in petroleum and in coal. It is an undesirable substance and fuel, because it injures bones and muscles.

Sulphur has many important commercial uses. Its chief use is to produce sulphur dioxide gas, which is used in making sulphuric acid. Sulphur is also used for bleaching and disinfecting. Large quantities of sulphur are used in the manufacture of gunpowder, vulcanized rubber and matches. It is also used extensively in the manufacture of insecticides for use in orchards and vineyards. The chief sulphur insecticide is known as lime-sulphur spray, which is made by boiling sulphur with slaked lime, by which process a deep-red liquid is obtained. This liquid is an excellent insecticide, especially for scale, and it can also be used as a fungicide.

Gift Of Tea For Queen

Century Of Production Marked By Empress Tea Growers

Last year was the centenary of the tea-growing industry in the British Empire, and the tea-producers of the Empire have celebrated it by presenting to the Queen a casket holding 15 pounds of tea. The casket itself is a lovely thing, made of Bombay rosewood inlaid with Ceylon satinwood and ebony, and the tea inside is unique. It is blended from 15 of the best known teas, seven from Ceylon, six from India and two from East Africa.

One of the components of this rare mixture is a tea from Darjeeling, which looks more like tobacco than tea, and is described as having a "very fine muscatel flavor." It is probably the most expensive tea in the world, \$32.50 a pound, and is used in minute quantities for flavoring teas of humbler vintage.

Make Final Run

Mail carriers who sometimes lock grips with death on the storm-swept trails of northern Manitoba have made their final runs between Norway House and Cross Lake. Aeroplanes take over the 60-mile route from this northern trading post and another of the courier mail rails will fade away.

The Cassiquaire, a Brazilian stream, sometimes flows in one direction and sometimes in the other.

England has now only one maker of hand-made nails; C. Williams

turns out 50 pounds of giant barge

nails in eight hours.

A PROGRAM OF REFORM URGED BY PREMIER BENNETT

Ottawa.—Ringing up the curtain on the 1935 general election campaign, Prime Minister R. B. Bennett announced his government would go to the people on a program of reform which he believed would bring prosperity and security against future depression. In what may be regarded as his most outspoken public address since the 1930 campaign the prime minister declared the time had come for changing the economic system. He asked for support that the government might effect essential reforms which were delayed in the fight against the immediate problems of the depression.

"And in my mind," said the prime minister, "reform means government intervention. It means government control and regulation. It means the end of 'laissez faire.' Reform heralds certain recovery. There can be no permanent recovery without reform. I raise the issue squarely. I nail the flag of progress to the masthead. I summon the power of the state to its support."

Opening a series of addresses in which he intended to lay the government's record and reform policies before the electorate, Mr. Bennett assured his listeners that there would be ample time for them to study the situation.

"You will have ample time to test this program of reform," said the prime minister, "and to decide upon its value. I will then invite your considered opinion as to whether reform is in fact necessary and whether my program of reform is wise."

"If you say 'yes' then I will not rest until I have put it into operation. But if you say 'no'—if you are satisfied with conditions as they now are—then I am not willing to continue in this office. If you believe things should be left as they are, you and I hold irreconcilable views. I am for reform."

With the date for a general election remaining to be fixed with October as the latest and some speculations placing it as early as April, the prime minister's remarks were taken as an indication that polling would not come until late in the summer.

Harking back to the 1930 campaign, Mr. Bennett recalled his promise to end unemployment. "That was a definite undertaking," he declared, "and by it I stand. Unemployment in Canada to-day is one of the consequences of this awful and unprecedented world depression."

"The continued faulty operation of the international economic machine has made re-employment impossible. I do not offer that as an excuse. I state a fact. Now that the time has come I am determined to try with all my strength to correct the working of the system in Canada so as prevent unemployment conditions may be put an end to."

"If we cannot abolish the dole we should abolish the system."

Since taking office the government's policies has been determined by the critical nature of circumstances. Emergency action was constantly demanded and there was no time, the prime minister said, for changes or reform of the economic system. "We had first to save the ship and guide it into less troubled waters."

Hundreds Attend Levee

Ottawa.—Nearly 700 attended the annual New Year's Day levee of the government held in the Hall of Plans of the parliament buildings. It was the fourth of such receptions held by the Earl of Bessborough since coming to Ottawa in April, 1931, as representative of King George.

Three New Titles

London.—New titles for the Prince of Wales were included in the King's New Year's honor list. His royal highness was made an admiral, a general and a marshal of the Royal Air Force.

W. N. U. 2060

Anglo-Irish Trade

Free State To Take British Coal In Exchange For Cattle

London.—A "gentlemen's agreement" whereby the Irish Free State will import a larger quantity of British coal in exchange for correspondingly increased imports of Irish cattle by Britain was announced recently.

The agreement between the two governments concerned was believed to be an important step toward the restoration of improved economic and political relations between the two countries.

Under its provisions, it is estimated that British coal exports to the Free State will be increased by more than 1,000,000 tons. The additional increase in imports of Irish cattle was set by Irish authorities at 150,000 head over existing quota limits.

A further outcome of the agreement will be the cessation of Irish imports of coal from Germany and Poland as soon as Free State contracts with those countries expire. The coalfields principally concerned are in South Wales, Lancashire and southwest Scotland. It is expected it will be of special benefit to the distressed areas.

It is understood that imports of cattle will be exempt from the special duties imposed on produce from the Free State in connection with the land annuities' dispute. In exchange, the Free State has agreed to exempt coal from the retaliatory duties it imposed on imports from Britain.

A Labor Council

Winnipeg Civic Administration Expected to Favor Man On The Street

Winnipeg.—The predominant Labor point in Winnipeg's 1935 city council exerted its force at the inaugural meeting and took control of the city's standing administration committees.

With Mayor John Queen at the helm and Labor representatives Manning four of the six most important posts it was made clear at the first meeting that Winnipeg's official craft would follow charters favorable to "the man on the street." They headed committee on finances, improvement, health and utilities.

At the November elections Labor, Independent Labor and Communist candidates made up nine of the 18 council seats and with the Labor mayor to cast a deciding vote it was clear Labor policies would be most favored.

Canadians In Saar Vote

Inquiry To Be Made At Coming Session of Parliament

Ottawa.—Inquiry will be directed to the government at the coming session of parliament about residents of Canada going to the Saar basin to vote on the coming plebiscite as to whether that territory should return to German jurisdiction.

J. A. Mercier (Liberal, L'Assomption), has given notice of a question asking the government to inquire into whether residents of Canada have voted in the Saar to which government officials have indicated such people in any way, is to the names and addresses of the people assisted and whether any step will be taken to have their names removed from the voters' list in Canada by reason of their voting in a foreign country.

Day Of Prayer

Mayor McGeer Of Vancouver Issues A Proclamation

Vancouver.—Mayor C. G. McGeer set aside Sunday, Jan. 6, by proclamation, as a day of "service, humiliation and prayer" and invited all aldermen, civic department heads, legislators, judges and magistrates, all other persons in authority and all loyal and law abiding people to assemble in their preferred places of worship that day.

He recommended a united cry for pardon in the belief "that we have fallen on evil days because we have forgotten God."

"My people are not justly treated," he said, "that the calamity of depression which now desolates the land and our community, was inflicted upon us for our presumptuous sins."

WOMAN K.C.

Here is a new picture of Miss Helen Kinnear, K.C., of Port Colborne, Ontario, who is the first woman King's Counsel in Canada.

Child Smothered By Snow

Trapped In Play Tunnel When Sides Caved In

Riviere Du Loup, Que.—A game played by every child who has lived in Canada in the winter time led to the death of Laval Lapointe, 11, and a narrow escape for his brother, Jean Charles, 13.

The two children of Alfred Lapointe built a snow fort and dug a tunnel under several feet of snow to use as an entrance. Then they decided to close the tunnel. Jean Charles had just got his head out of the mouth of the tunnel when his brother closed behind him, when the sides caved in, trapping both.

Several hours later a neighbor, attracted by the cries of Jean Charles, ran to the scene and pulled him out, the lower part of his body badly frozen. Laval had been dead for some time, smothered by the snow.

Yeggmen Blow Safe

Vancouver Store Robbed Of Jewelry To Value Of \$12,000

Vancouver.—Jewelry valued at approximately \$12,000 was stolen by burglars who rifled the factory safe of Jacoby Bros., Ltd., wholesale jewelers, overnight. The loss is covered by insurance. The robbery was discovered when the establishment was opened next morning.

The yeggmen forced entry into the safe by blowing of the dial. Another safe in the office, containing a similar amount of valuables, resisted the efforts of the robbers.

Flowers In Antarctic

Little America, Antarctica.—Discovery of a wealth of Antarctic flora on the ice-covered slopes of the mountains on Marie Byrd Land was reported to Rear-Admiral Richard E. Byrd, by Paul A. Siple, leader of the Marie Byrd Land sledge party which returned to Little America from the first scientific penetration into this new land.

This compared with \$54,511,087, collected in the same period last year, showing a net increase of \$209,561.

Toronto led in total collections with \$16,696,168, a net increase of \$1,337,117.

In other district totals were: Vancouver, \$3,792,797; Charlottetown, \$261,684; Halifax, \$593,182; Winnipeg, \$1,675,786; Kingston, \$159,151; Edmonton, \$38,349.

BRITISH TROOPS LEAVE FOR THE SAAR

Our picture shows British troops preparing to embark at Dover to join the International Force at the Saar to keep order during the January plebiscite. A huge transport is being hoisted from the quay for shipment with the soldiers to Calais.

New Rule For Convicts

If Conduct Satisfactory Will Be Paid For Labor

Ottawa.—Convicts in Canadian penitentiaries will receive a money payment for their labor starting with the new year, Brig.-Gen. D. M. Ormond, superintendent of penitentiaries, announced on the authority of Minister of Justice Hugh Guthrie. They will be paid at the rate of five cents a day for each day they work, provided their conduct and diligence is satisfactory to the warden and provided they are not undergoing punishment of deprivation or any privilege for offences against rules and regulations.

The new rule is designed to encourage good conduct and diligence on the part of convicts undergoing sentence and to provide them with a small sum of money with which to maintain themselves on their release until they can secure employment.

In addition to the five cents a day for actual work done the convicts will be allowed five cents a day for each day of remission they have earned at the time of their release in excess of 72 days. Under the rules convicts are entitled to six days' remission a month for good conduct until they have earned 72 days and thereafter to 10 days a month. A convict with 100 days' remission to his credit is released 100 days in advance of the normal expiration of his sentence.

Stratosphere Flight

Wiley Post Attemp To Fly From Coast To Coast At High Altitude

Los Angeles.—Wiley Post, noted aviator, announced he would attempt within three weeks, to fly from Los Angeles to New York through the stratosphere.

Wearing his own designed "stratospheric oxygen suit," he said he expected to keep his ship, the Winnie Mae, at an altitude of at least 30,000 feet during the trip, which he estimated would require eight hours. Post said he hoped to maintain a speed of not less than 330 miles an hour.

"I know that my oxygen suit will protect me from the cold and atmospheric conditions at 30,000 and 35,000 feet altitudes," he said.

Income Tax Payments Up

Substantial Increase Over Same Period Of Last Year

Ottawa.—Income tax collections for the first six months of the present fiscal year ended December 31 amounted to \$54,720,648, according to a statement issued by Minister of National Revenue R. C. Matthews.

This compared with \$54,511,087, collected in the same period last year, showing a net increase of \$209,561.

Toronto led in total collections with \$16,696,168, a net increase of \$1,337,117.

In other district totals were: Vancouver, \$3,792,797; Charlottetown, \$261,684; Halifax, \$593,182; Winnipeg, \$1,675,786; Kingston, \$159,151; Edmonton, \$38,349.

YEAR JUST PAST PROVED ONE OF STEADY PROGRESS

Montreal.—A year of definite progress toward a better economic position in Canada is the description of 1934 running through many articles on the country's business and industrial progress published in The Montreal Gazette's commercial and financial review.

"If the year 1934 failed to realize fully all the predictions of 1933 prophets," wrote Paul Binkley, editor-in-chief, "it was nevertheless a year of progress."

Mr. Binkley found large increases in the physical volume of business, in exports of trade, including higher exports of newspaper, pig iron, steel, etc., and an encouraging rise in the volume of revenue freight carried by the railways. The improvement, however, was by no means general.

E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, stated his view the recovery from the depression was coming about through slow rebuilding, rather than a boom.

Mr. Beatty was confident Canadian wheat would find a steady market at fair prices. He pointed to increased exports of minerals, lumber and bacon at better prices, "largely owing to the imperial trade agreements" and the newspaper industry as clear signs of recovery.

S. J. Hungerford, president of the Canadian National Railways, devoted his review to the operations of that system, pointing out an increase of approximately \$16,000,000 in gross revenues.

There had been a significant substantial increase in the movement of manufactured products and merchandise, demonstrating increased business activity.

Riots In Saar Territory

Nazis And Anti-Nazis Clash In Turbulent New Year Row

Saarbruecken, Saar Basin Territory.—Nazis and anti-Nazis in the Saar counted bullet wounds and bandaged heads after the turbulent opening of the New Year.

The League of Nations governing commission, meanwhile, moved to forestall further political strife, warning Nazis the order against political demonstrations and any such rioting welcome as was shown by the first Saarlanders arriving from abroad to vote in the plebiscite Jan. 18.

Thirty former Saar residents arrived from Chile and were quietly taken in taxis to their places of residence.

As reports of heated clashes throughout the territory continued to trickle into Saarbruecken, the toll of those injured in the last 48 hours was set at 100 or more. Two men were found dead—one stabbed, the other shot—but it was not certain their deaths resulted from political quarrels. The German front set its injured at 60.

The New Year's disorders brought the arrest of 50 persons, it was reported but not officially confirmed.

Pilot Warns Of Fire

Fires Low To Awaken Residents In Ontario Village

Clearville, Ont.—Action of an unidentified airplane pilot in flying so low over this Kent county village that he awakened the residents probably saved property and life from fire here.

The pilot noticed the general store was on fire. He circled the village three times. The roar of the engines warned the villagers and drew their attention to the fire.

Moyley Sheld, proprietor of the store, probably owed his life to the action of the pilot. When he was awakened in his living quarters above the store he found all means of escape except a window, were blocked. He saved his life by leaping to the ground.

The store was destroyed but volunteer firemen succeeded in saving nearby buildings.

MOTOR VEHICLE LICENSES

Announcing reduction in fees effective January 1, 1935. Reduced fees for lower priced passenger cars will be charged as follows:

Not exceeding 100 inch Wheelbase	\$10.00
Exceeding 100 inch up to 105 inch Wheelbase	\$12.00
Exceeding 105 inch up to 110 Wheelbase	\$15.00
Exceeding 110 inch up to 115 inch Wheelbase	\$20.00

The fees on all cars exceeding 115 inch Wheelbase will be the same as in former years.

A reduction of \$1 will also be made in the fees for models made eight years previous to January 1 of the current license year, on those cars with Wheelbase of 120 inches or less.

All Fees Due and Payable January 1, 1935

Those operating Cars after January 15, 1935, without Licenses will be liable for prosecution.

The Christmas Necktie.

One of the practices or rites in connection with the observance of the Season of Yewi is the bestowal of presents on relatives and friends. (Evidently a reminder of the gifts that the wise men—Kaspar, Melchior and Baltazar—brought to the newborn Babe in the Bethlehem manger centuries ago.) The lifetime of the majority of these presents is brief and uncertain, for which "Allah be praised!" They have a short period of popularity until they find a well-deserved burial in the subterranean recesses of garbage cans and waste baskets.

Amid the many and varied Yuletide reminders that flaunt their brazen presence long after their allotted season, none can hold a candle to the "Christmas tie." Fashion may decree revolutionary ideas of costume, the female waist-line may rise and fall like the ocean tides (and about as regular) but the embossed and spectacular tie of Yule holds a perennial place in the list of Christmas spending or of the shop-modernized mind. Oh tis where in thy victory? What floods of vituperative abuse: what ocean of super-heated and salacious profanity have oft been poured out in protest against thy iniquitous presence! For weeks after the holiday season, staid and respectable business men, whose minds are above the frittering follies of fashion may be seen wearing ties that look like a mess of scrambled paint or a drunken kaleidoscope of color. It is their badge of servitude to some strong-minded female; an admission that the wearer is no longer the comely object of desire or of desire. Its presence sheds a doubtful diamond over the lives of many, and there are married men of otherwise spotless character who have been turned into despicable hypocrites because they lacked the courage and backbone to boldly assert their independence and determination to select their own haberdashery. May a good citizen of fair repute and good standing in the church has ruined his chances of heavenly reward by the murderous thoughts that encompassed his soul while he smilingly accepted from the wife of his bosom a hand-knitted cold streaky, when a tin of smoking tobacco or a bottle of "Scotch" would have been a more acceptable gift.

Once in the dear old days beyond recall I was enjoyed into wearing a loud riot of color that had been given me the Christmas previous. It was summertime before I finally mustered up enough courage to appear in public. I remember having to do some work in the garden at the time and I perspired somewhat freely. The color moved back and I dumb near died of painter's colic. I broke out in a bright rainbow rash of orange, green and purple. I looked like a row of De Kuyper's gin boxes back in the old days on Montreal wharf, after the arrival of a steamer from Holland with a full cargo of "widow's comfort."

I have a certain fondness for standing (he's over six feet) who has an accumulation of red-hot, weird, monstrous creations that would about start a riot. He has been receiving them for years from female relatives. Never has he ventured to wear one in public. It would necessitate calling out the nearest fire brigade.

The pernicious habit of handing out these Xmas atrocities would soon decrease if determined steps were taken to prevent the spread of the plague. This should not be a hard matter to control as effective sprays and poisons have been found for the control of bugs, bats, San Jose scale, Colorado beetles, ticks and other pests. Someone would confer a blessing on humanity if a practical scheme would be concocted for the extermination of the particular pest who yearly bestow the "Christmas tie" on their silent and suffering victims.

TOWN OF STONY PLAIN.

Notice to All Householders and Occupants of Property.

NOTICE IS HEREBY GIVEN that by an amendment recently passed to the Town's Fire Prevention Bylaw it was enacted as follows:

"All ashes removed from any stove, grate or furnace shall be carried out in metal or other fire proof vessels properly protected so as to prevent danger to property and shall forthwith be deposited in metal containers of not less than forty five gallons capacity. Such containers shall be provided with metal covers and shall be placed in the alley behind the lot at least two feet from any wooden structure."

Householders are required to govern themselves accordingly and to take notice that failure to comply with the provisions of the Bylaw will render them liable to the penalties thereby provided.

The Council requests the co-operation of the citizens with a view to minimizing the risk of fire within the Town.

By Order of the Town Council.

JAS. MALLCH.

Secretary-Treasurer.

BROKE HER LEG AGAINST A STAIR

Whilst Hammered By Rheumatism

"Two years ago," writes a woman, "I was suffering with rheumatism in my legs, and when walking upstairs one day just kicked my right foot against the stairs, and broke my leg just below the knee. I was in hospital for four months, and when I came out some one advised me to try Kruschen Salts. I did so, and now I have no trace of rheumatism. I would not be without my bottle of Kruschen, which I take every morning—half a teaspoonful in warm water."—Mrs. P. B.

The six salts in Kruschen stimulate the circulation and exert a regular action: assist them to get rid of the excess uric acid which is the cause of rheumatic pains. When polarized light goes with its deposits of needle-pointed crystals, there's no doubt about those aches and pains going too!

THE TENDERFOOT

By
GEORGE R. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER VIII.—Continued

They made their first camp at Box Springs, a little alkali-marked "draw" where the thirsty ponies and burros at first refused to drink, the white-encrusted water in the shallow pools. The three men had to boil every drop before drinking and even then Dustin could not swallow the bitter stuff till Kane flung into it some slices of the sour cholla buds that made it drinkable.

It was a cold camp where the wind drove down on them in a steady gale while the hobbled ponies stood with their tails against the wind. Dustin sought his blankets early and lay with a pipe between his teeth thinking his unheathy thoughts. So intent was he on his plans that he did not even realize that even then he had his choice . . .

Kane pulled him from his blankets at dawn and again they headed westward against the line of the blue foot hills. In that wild tangle of mesquite and aspen and madrona Dustin reflected any man might be pardoned for not being sure of his own property lines. This might or might not be Sour-glass land.

All that day they rode slowly up the slope; they headed long "draws" and followed devoured trails that clung to the hillside, a man's eyebrows clinging to his face till finally, on a bluff point that overlooked the valley of the Stinking Water, old Kane stopped for a halt.

If You Eat Starches Meats, Sweets Read This

*They're All Necessary Foods
—But Acid Acid-Forming,
Hence Most of Us Have "Acid
Stomach" 100% Times. Easy
Now to Relieve.*

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion. It is a blunder to eat too many acid-forming foods in our modern diet. And that there is now a way to relieve this . . . often in minutes.

Simply take PHILLIPS' Milk of Magnesia after meals. Almost immediately this acts to neutralize the acidity that brings on your trouble. You forget he has a stomach!

Try this just once! Take either the familiar liquid "PHILLIPS'" or the convenient tablets. A tablet of a teaspoonful of PHILLIPS' Milk of Magnesia.

Also in Tablets Form
PHILLIPS' Milk of Magnesia Tablets
are now on sale at all drug stores
everywhere. Each tiny tablet
contains a full teaspoonful
of the famous liquid
Milk of Magnesia.

W. N. U. 2080

"Right down there's where Corse an' Gray were at work," he said and jerked a finger toward the flat where a deep canon cut into the hillside like a deep cut in a cake. Those words changed Sam Dustin's mind into adamant. Till then he had sought some elusive scheme by which he could forego his first resolve; some other way to insure old Kane's silence. Now he knew there was no other way. Old Kane knew and what he knew, sooner or later, he would tell and if he told, then he, Dustin, and Goddard would certainly go to jail for ten or maybe twenty years. There was no help for it now.

"That's over yonder's a good place to camp if you kin drink that stinkin' sulphur water that it's named for," said Kane.

"How far is it to the claim?" asked Dustin.

"Not more'n a thousand yards." Kane headed his pony down the hill and waved to the loitering Peyolt to drive the burros into camp.

They came in with drooping heads and quivering flanks for that last day's march had taken toll of them.

"Three days' march for us," wheezed old Kane, "and not more'n twelve miles as the crow flies from the Hour-glass. Wouldn't old man Carr give a man's-sized drink to know what we know about what lies at hand under his land?"

To Dustin's queasy conscience it seemed that Kane was just clawing for trouble. He felt sick at heart, his head was dizzy and there was a pleasant smell of mandrake and mandrake on the wind but the day seemed dark and dank to him. He felt sick and he noticed that the palms of his hands were wet with sweat. The thing that he meant to do made him sick at heart, yet he felt not the slightest hesitation about doing it. He had to do it or . . . go to jail, maybe for life! Once or twice there came to him memories of other days! Memories that he had, more or less successfully, stilled till now. He remembered his Alaska trip in '99 and the heartrending trail over Chilkoot. He could never forget Bender. They had caught Bender, stealing flour when a pound of flour was worth a man's life and Bender had paid the price. He remembered that Bender, before they shot him, had told them that some day they would regret it. He wondered vaguely why he should think now of Bender . . . Kane had stolen no food as Bender had. Kane had not . . . Wait! Kane and Kane alone knew where that gold was that would make them rich; that would enable him, Dustin, to get Ed Carr and choose the pleasant places of the earth in which to live. . . . Once he knew where that hidden vein lay all would be his . . . But . . . Dad Kane must never return to tell what he knew!

He watched the old man hobbling his pony and set out with a bucket for the spring. He watched Peyolt cutting up some bacon on the bottom of an overturned bucket and placing a huge coffee-pot on the fire. He ate his supper in silence and, while he was still smoking, old Kane rose.

"Come on, Dustin," he said with a smile grin. "I'll show you where it's at."

Dustin rose and stretched.

"All right," he said pleasantly. "Take one last look at the ponies. While I don't smoke tobacco . . . Be with you in a minute."

His bony fingers pulled a package from his saddle-bags and he was aware of Peyolt's eyes centered on his back. He laid that package unobtrusively on a flat rock and walked out to join Kane. He was acutely aware of Peyolt's watching eyes and of his greedily slavering mouth. The moment the two men disappeared around a turn in the trail Peyolt's eyes lit with a somber glow as he seized the package from the rock and tore it open. He withdrew his hand full of a brown substance like dried liquorice root and a thick bundle of evil-smelling, stubby cigarettes from the ends of which a brown substance, that was certainly no tobacco, fell into his eager hands. Peyolt snatched them with a little choking cry. In one motion he crammed his mouth full of the dry dust and with another lit one of the cigarettes.

For the next hour the gorilla-like figure squatted over the fire lighting one cigarette from the butt of another while old Dad Kane with his employer walked unknowingly into the Valley of the Shadow.

CHAPTER IX.

Kane led the way across the flat to the lip of the canon where a line of juniper trees showed their tops above the edge.

"It's down in the bottom," he said briefly. "You can't see the place from here. I'll show you."

Dustin followed him down the shallow bank and, as he scurried along the slope, his mind concentrated, not on what Kane was to show him but on what he himself intended to do. Obviously it must be done back in camp where Peyolt had been given time to get under the influence of the drink that had been so artfully placed in his mouth. Would Kane suspect? Would Dustin feel that he could not endure a struggle. Would any part of his plan that involved Peyolt miscarry? If it did, the whole plan must be abandoned. His nerves were frayed to a緊張ing when Kane, stopping at the foot of the steep incline, turned on him sharply.

"Look there!"

His hand pointed to a red spot on the hillside fifty yards down the canon. It was not much; just a form of "glory hole," with which Dustin was perfectly familiar. Kane had cut back into the hillside for some eight or ten feet and had bare a vein of rock. He had followed that vein in its wandering and had cross-cut to a ledge to intercept the vein at a turn in the slope and he had stripped a vein at sight of which Dustin knew a little of ore and ore-values whistled. That vein and all above it was gold! Gold clear up to the grass roots!

"I tried to fill it up again after I'd picked up the vein," said Kane, "but it was too much work. There's no danger of anybody stumbling on it up here anyway. There's mighty little water! none in this canon. That's why Gray an' Corse was rustlin' to the east. Cattle don't come up this canon much. If there ain't any Hour-glass cattle here, yore men got no business here."

"He cackled in snide laughter. "You better mind what I tell you, Dustin, about keepin' yore men off the Hour-glass stock till we git this mess straightened out."

Dustin sat down on a big bowlder and made some rapid calculations. There was no water in this canon. Then they could not run a table; a wimpy table that runs with little water and less rock. The best they could do would be to dam Chollo Creek across the ridge just upstream over here and have a table. Maybe set up a four-head stamp-mill and table the dirt. He knew that the very first burst-head of ore out to a smelter would give the whole thing away and there would be a rush to that canon that would throw into the shade the rush to Tonopah. He had taken part in that rush and remembered it well.

Of course old Kane was quite right about Miners Law. Kane had located that ore-head and he was entitled to follow it, but . . . Was it actually on Hour-glass land? If it was, there might be a fight. But there was a question about it. With so much land up here, it was almost impossible that a man should know his lines. He said as much to Kane. The old man laughed grimly.

"If you're honest about that, an' I doubt it most damnable, it ain't likely you're honest about land than cattle. If you steal Joe Carr's cows, you steal his land. I say, you're honest about that then the best thing to do is to see old man Carr. If he's properly approached, he'll probably sell mineral rights on a royalty basis. It'll be

better to git a share than to have a fight in court."

Dustin snorted. "If you even try to talk to Joe Carr you'll give the law a chance to him. Just one word dropped to him gives him the information he needs. On the other hand, there's pay-dirt on the land of the Hour-glass; there'll be one hell of a row and don't you forget it. We'll say nothin' to Carr. Let's get back to camp. We've got to get some stakes and locate the claim before he learns about it."

They headed back for camp and Dustin spent the last hours of daylight splitting and felling a half-dozen stakes from a dead juniper tree. The moon presently came up, a great yellow ball over the eastern ridges and the hobbled ponies wandering through the brush sounded like an avalanche in the stillness.

Dustin eyed Peyolt. All was going as he wished. Peyolt had found the heap of cigarettes and dope and had smoked himself into a Nirvana of his own. He was lying back on one pack-saddle, his feet on another and was staring straight up at the stars that winked at them through miles of windy space. Peyolt had passed into that drug-induced sleep that would last till the cold of early dawn would awaken him. After that he would be violently ill. From time to time Dustin could see him shiver and he knew well enough what was taking place. Under that potent drug the fool who was it was suffering worse torture than De Quincey ever knew. Those tortures would drag him through the Seven Hells of terrorized sleep in which his feet were clogged, his mind alert. He could see and feel things that he could not avoid. Dustin's blood ran cold as he contemplated his victim. . . . His plan of Peyolt and not old Kane was the real victim.

A voice as loud as a shout suddenly assailed his ears. "A voice to which he had never listened screamed at him through years of a questionable past. He had not heard his conscience for many years and he did not know it now. But it shrilled a question in his startled ears.

"What do this thing? What could it avail him?"

The answer came after years of halting.

If old Kane went back to civilization with what he knew; if he talked to men he knew in Seep; and a drunken prospector was bound to talk; he would strip Dustin and Goddard of all that they had, won through so many years. For just one brief moment what had been his better self appealed to him. . . . Was it not better to let old Kane go free? Was it not better to give up what he had dishonestly won and to be able to sleep at nights than to have forever as his sleeping and waking accompaniments those eerie spooks that consciousness could conjure up? For

just one brief moment those thoughts came to him. Then . . .

He saw a line of blank gray walls at Florence with armed wardens pacing the crests of those walls. He saw himself in a striped suit wielding a heavy hammer. Instantly he threw the thought aside and came back to an earthly earth. That fate should never be his! Dad Kane and Joe Carr could go to hell.

He would take Eighth Carr; in that moment her radiant beauty shone out in a moment of irradiated passion. . . . He had known many other women and he knew that what had won them would win her. A little force and a few kisses given judiciously would win any woman. And after this question of property was settled, he would have a stranglehold on her. No decent woman would see her father ruined rather than marry a personable man who could and would save that father! He stood and watched the quivering Peyolt, then strode back to the fire and lit his pipe with a half-dead ember. Suddenly he made up his mind. This was the time.

"Fay, Dad!" he called. "Dad Kane . . . I wake up . . ."

(To Be Continued)

Synthetic Vitamins

Isolation Of A More Vigorously Acting Type Of Vitamin D

Isolation and synthetic production of a new, more vigorously-acting type of vitamin D, the "sunshine vitamin," was announced at the basic science laboratory of the University of Cincinnati.

Vitamin D is the bone-growth producing, ricketts-preventing organic chemical compound produced in nature by the action of the rays of the sun.

Dr. George Sperli, head of the laboratory and authority on irradiation, announced its subdivision and production synthetically by irradiation with selected wavelengths of ultra-violet light.

Once, a Summer Novelty— Now, a Year-round Necessity

More and more every day, thrifty housekeepers are finding new uses for Para-San Heavy Waxed Paper and "Centre Full Packs".

Preserves the freshness and flavor of "left overs", baked goods, meat and fruit. A good substitute for refrigeration in cooler weather.

Your grocer, Druggist, or stationery keeps them.

The Skoo Skooters.

Members of the Skoo Ski club motored out to the hill at Hubbel's farm on Sunday A.M., where jumping competitions and other sports were indulged in. A very enjoyable time was experienced by all. On their return to town a vote of thanks was given the motor car owners for their generosity. Another sports afternoon is planned for Sunday next.

Baling Straw at Camrose.

In Camrose district baling presses are now at work, each turning out about 10 tons a day of wheat straw for shipment to the U.S. The presses are operated by 4 men and the power used is the old-fashioned "sweep" pulled by 2 horses. Farmers are getting at the rate of \$3 per ton; \$2 of the proceeds are paid to the baler, the farmer receiving \$1 net for the straw.

Brightbank News.

Wedding bells are again ringing in this district and promise to continue for some time.

Mr. Don McDonald is making preparations for a lengthy visit with friends in the district east of Edmonton.

A surprise party was held recently at the home of Mrs. J. Fryer, in honor of her son Raymond's birthday. An enjoyable lunch was served, All report having had a good time. On leaving, all hands wished Raymond many happy returns of the day.

Patronage Dividends.

Patronage dividends aggregating \$4177.88 were sent out from Central Office Jan. 2 to UFA Locals and Co-ops throughout the province which are doing business thru the UFA Central Co-op. These dividends cover the quarter ending Dec. 31.

Canada Makes Progress Says Beatty

C.P.R. President Reviews Past Year and Finds Evidence of Permanent Economic Improvement in Advances so far made—Predicts Canadian Wheat as Best in the World will find Steady Market.

THE course of our recovery from the economic catastrophe of 1929 and 1930 has been markedly different from that of any of the previous cases of business expansion in this country. This is due to the fact that we are experiencing a process of slow rebuilding and, as far as I can see, one of permanent re-adjustment of our economic action to the new conditions of a rapidly and permanently changed. What we are today experiencing is a period of recovery which is steady, and I hope permanent growth.

E. W. BEATTY, K.C.

Chairman of Presidents' Conference Committee. E. W. Beatty followed a temporary depression after the 1929 crash, but Canada is concerned chiefly the result of forces and conditions in other countries. Actual productive boom resulted from foreign demand for Canadian products, and from conditions in other countries which directed a flow of capital into Canada. These conditions have resulted in the economic collapse in Canada resulted chiefly from forces operating in other countries.

Nothing is more important in our economy than our expanding industry. In the case of wheat I have never accepted the alarmist views which have been freely expressed. The world market is too large to be controlled by any single country. I do not desire to examine their possibilities and to find out if they really are as dangerous as those who early in the depression said they would seem to believe. This is all to the good. If unified management will not stand up under the conditions that have existed, it should not go forward. But the criticism should be fair and honest and it should be based upon a fairly sound understanding of rail transportation and not upon personal interest or prejudice. I say nothing less than the truth when I affirm that most of the criticism that has been made to date will not stand up before any one or even two or three of the above tests. I shall not further dwell with the critics here, except to say that I can see no other way than unified railway management in which the country can put a stop to the continual hemorrhage of capital and of money and can safeguard the future of both railways while adequately preserving the property of the Canadian National, of the Canadian Pacific, and those of the shareholders of the Canadian Pacific.

It is to be regretted that the first five years have seen a further increase in the debt of the Dominion, the Provinces and many municipalities. Much of our public debt has been incurred for purposes obviously legitimate as part of the ordinary government of the country, but much has resulted from experiments in the

direction of governmental participation in business. Regrettably, the cost of private enterprise has been the cost of private enterprise in this type of loss is corrected by a reduction in the income and capital holdings of those who have been subjected to the same close supervision. The public authorities have long given to railway operations and tariffs. In this case also public opinion is pressing for better handling of the situation. The drivers do not question the advisability of building good roads, or of permitting them to be used for commercial purposes, but the present attempts to proper control of this operation will, in my opinion, return to the railways and to the taxpayers. The losses taken from them by highway and rail transportation on a somewhat.

It is also interesting to note a growing public sentiment in the direction of demanding some control and the upkeep of our great and costly railway system from those who use them—especially in the case of ships of foreign registry.

In this connection of these special cases of unfair competition, the Company must defend itself for a restoration of its normal position on a restoration of Canadian prosperity in general. The outlook in that respect is comforting. The very careful studies prepared by the Dominion Bureau of Statistics indicate conditions which would make it.

In this great and rapidly populated country, which, however, be talking only of recovery, Canada should look forward to expansion in every direction. To do this the policies must be issued that are very simple. I should like them as: scrupulous care to prevent the debts of public bodies and resulting destruction; creation from the farms; increase; concentration of our efforts both in public and private business on the increase in the wealth and prosperity of our primary industries—especially agriculture; public and private business policies looking to increase the population of Canada; and, as I have repeatedly said, an immediate correction of the burdensome and wasteful system of transportation facilities.

It appears to me that we can look back on 1934 with some contentment, as a year during which we found that the year was not ending, and that by industry, and by the sheriff: nations and individuals could still prosper. What interests me is that in 1935 we can look forward to 1935 and successive years with confidence that under Providence we shall see in the year to come the future which too many of us seemed to lose, and that we shall again come to the conclusion that all that is wanted to set this country on a forward path of progress are such simple virtues as energy, honesty, and ordinary common sense.

Card of Thanks.

Mr and Mrs Nisk Pasemu, of Carvel, wish to thank the friends in Stony Plain for the generous treatment accorded the family at Christmas time.

Steady Progress.

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has The Family Herald and Weekly Star. This is not strange, for it is evident that in time of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes, and they find in The Family Herald and Weekly Star a paper which, at \$1 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up to the minute articles, short stories, together with a weekly news-section which rounds out a feast of reading without compare. Truly it has been well said that The Family Herald and Weekly Star is the best for the least.
